

Pay Per Project für Structural Engineers

Do you need project-related special structural design software? A purchase is not possible at this time? Here you will find your individual solution!

Do you need project-related special statics software?

A purchase is not possible at this time?

Our solution for you is: "Pay Per Project"!

In this way you can improve the quality and success of your project processing - and benefit from the following services

- You receive the required software for a limited period of 3 months
- Project processing can take place immediately
- Accompanying project training increases your project success
- Your investment is related to the project and remains calculable
- The full hotline and software service is included in the price during the project processing!

On Top applies:

If you purchase the software used with "Pay Per Project" up to 4 weeks after the end of the deployment phase, we will credit the payment made for the software at 100% of its list price!

Supplementary Offer Condition: For new customers licensing takes place computer-related as single place as soon as we have received the payment. The costs on delivery amount to 30% of the list price once, but at least 350,- €. Additional program options can only be ordered in connection with the corresponding basic module, even if it already exists. Training is obligatory for special topics in the areas of FEM in building construction and bridge construction as well as foundation engineering and CAD. Please contact us!
