RIB | Connex

Connect data, workflows and teams in one unified platform

Connect data, workflows and teams in all phases of construction

Connex Construction Cloud is your construction management software for all your projects from precon to closeout. Manage all your critical workflows, make BIM available to all project teams to enhance constructability in your projects and standardize field execution. Secure seamless collaboration and coordination from the office to the field and build with less risk and better profits.

Work Efficiently

Set your projects up for success with connected workflows. Standardize your critical workflows and ensure all crucial project information is captured and shared with the relevant teams. Resolve issues faster and get full documentation in one place.

Reduce Risks

Changes to the project material is constantly occurring as construction projects progresses. It is highly important to track and document all changes and follow derived consequences to stay ahead of rework, delays and cost overruns.

Team Collaboration

Connect all teams and make sure everyone can collaborate, coordinate and share critical project information regardless of location, role or phase in the project. Plan ahead, improve transparency and reduce information loss.
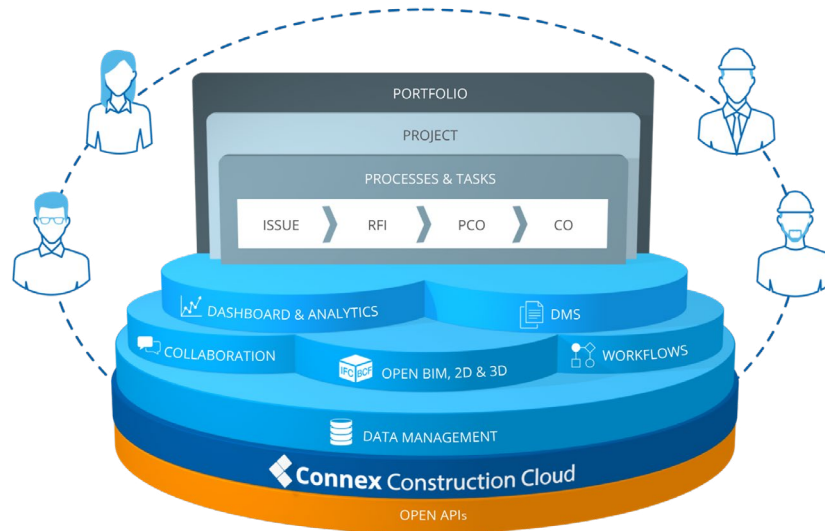

Increase Predictability

Break down data silos with connected data and uncover every detail of your project. Make confident decisions based on real-time data and get predictive insights with interactive dashboards that helps you to reduce risks and increase profit margins.

One platform – Many options

Design Collaboration	Construction Management	Field Management	Quality Management	Defect Management
Coordinate design, perform visual inspections and manage collisions effectively	Manage all project changes in one place and get overview of RFIs, variation orders and deviations	Collaborate effectively in real-time and access project information, BIM models and checklists anywhere	Manage all inspections, QA plans, test plans, health & safety issues and checklists	Perform inspections, NCRs and easy handling of defects before handover

CONCEPT   DESIGN

RIB | Connex
Connect data, workflows and teams in one unified platform
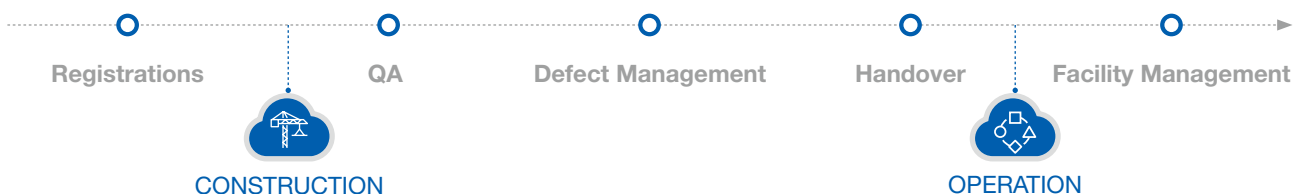

One platform for your construction projects

Advantages to Connex Construction Cloud

- Owners, consultants, general contractors and subcontractors connected in one platform gives strong collaboration and improved transparency.

- Interactive BIM viewer on all devices makes it easy for all teams to inspect and coordinate design and constructability issues, make on-site registrations and inspections.

- Manage all construction workflows and tasks in one place. Wide range of pre-defined workflows or customize your own to fit exactly your project's need and company standards.

- Manage and combine all data in a safe environment and integrate with 3rd party applications by using our open APIs.

- Ensure high quality in your construction projects and build right the first time.

- RIB is always ready to help – we offer free technical support for all users.

Making engineering and construction
more efficient and sustainable!

Managing the entire building lifecycle from planning to construction, the development of our powerful portfolio of software solutions is driven by industry expertise, best practice and a passion to remain at the cutting edge of technology. Ultimately, connecting people, processes and data in innovative ways to ensure customers always complete projects within budget, on time and to quality, while reducing their carbon footprint.
