

**All the power of CostX,
without the IT overhead –
accessible anytime, anywhere.**

Reach for the Cloud with RIB CostX

Flexibility and efficiency have never been so important in the construction industry. Quantity surveyors and estimators worldwide are turning toward cloud solutions in pursuit of the most reliable and accessible software support for their evolving needs.

CostX Cloud delivers the full functionality of RIB CostX, hosted in a secure, cloud-based environment. Whether you're a growing consultancy or a global firm, CostX Cloud helps you work smarter – with greater flexibility, scalability, and peace of mind.

Advantages of RIB CostX Cloud

Improved Access and Collaboration

- Access CostX software and data from anywhere with internet
- Work flexibly - in the office or remotely
- Boost team collaboration across locations

Scalable Based on Your Business Needs

- Scale up/down easily depending on business requirements
- No need for costly hardware upgrades
- Handles growing data and complexity with ease

Automatic Updates and Maintenance

- No more manual software updates or data migrations
- Always have the latest features and enhancements
- Updates handled seamlessly in the background

Focus IT Resources Where They Matter Most

- RIB handles hosting, updates, and maintenance
- No need for in-house infrastructure
- Free up internal IT for higher-impact work

Predictable Budgeting for Better Financial Management

- Lower upfront costs with a subscription model
- Reduce overall IT spend
- Easier to plan and manage project budgets

Data Recovery and Business Continuity

- Built-in security and automated backups via Microsoft Azure
- Reduces risk of data loss or unauthorized access
- Ensures business continuity and disaster recovery

Who is CostX Cloud for?

- ✓ **Growing businesses** needing reliable estimating tools without additional administrative burden on IT teams
- ✓ **Remote and hybrid teams** requiring secure access from anywhere
- ✓ **Enterprise clients** who want scalability, uptime, and hassle-free deployment
- ✓ Best suited for organisations with **4 or more CostX users.**

Frequently Asked Questions

Question	Answer
What provider is used for the RIB-hosted CostX Cloud deployment?	RIB CostX Cloud is hosted on the Microsoft Azure platform and fully managed by RIB - ensuring reliability, scalability, and global reach.
Where is RIB CostX Cloud available?	RIB CostX Cloud is available in all supporting Microsoft Azure data centres around the globe. We ensure high availability and performance by configuring CostX Cloud to the closest Microsoft Azure data centres in your region.
How secure is RIB CostX Cloud?	Security is top of our mind. The platform is hosted on ISO 27001-certified Azure infrastructure and published over HTTPS with industry-standard 2048-bit SSL encryption. Additional safeguards include tenant separation, robust access controls, and identity management.
How does licensing work?	CostX Cloud operates on an annual subscription basis with a minimum of 4 users. Each user licence is equivalent to a standard CostX licence, and a minimum 12-month term applies.
What versions of CostX are supported, and how are updates handled?	CostX Cloud always supports the latest released version of the software. Major and minor updates are applied automatically, and patches are rolled out as soon as they're available - no action required on your end.
Can I download my projects or export them to RIB Benchmark?	Yes. You can easily export files from your cloud environment to your local machine. You can also share data between CostX Cloud and RIB Benchmark quickly and securely.
Will I receive support from RIB?	Absolutely. All CostX Cloud customers have access to our self-service portal and dedicated support team via email, ticket system, or phone.
What does the data migration process look like for an on-premise customer looking to move to Cloud?	Data migration typically involves restoring your database or importing projects using the built-in Import and Export tools. Our team will guide you through the process.
How long does cloud migration take?	It depends on the size of your database, but most migrations are completed within a day.
How easy is it to scale if we need more users or licences?	Very easy. Additional named users are usually added within 1-2 business days, while new subscriber environments can typically be provisioned within a week.
