RIB | CostX Quantify

The Advanced 2D & 3D/BIM Takeoff Solution

The Advanced 2D & 3D/BIM Takeoff Solution

RIB CostX Quantify is suitable for users who only need to perform measurement. The software supports take-off for 3D/BIM files as well as 2D drawings via our powerful and easy to use platform. Users who decide to integrate estimating spreadsheets at a later date can easily upgrade to RIB CostX Complete.

Save Time and Improve Accuracy

CostX streamlines quantity takeoff, enabling users to swiftly produce precise quantities without the need for manual calculations.

Avoid Manual Revisions

CostX automatically adjusts quantities based on revised designs, removing the need for manual revisions while minimizing calculation errors.

Improve Collaboration and Communication

CostX enables seamless collaboration by allowing users to work concurrently from a single source of data. This fosters improved communication and alignment among team members, reducing risk of missed details.

Reduce Risk and Empower Decision-Making

By providing reliable cost data, CostX supports informed decision-making by identifying risks early for proactive management. This minimizes the likelihood of cost overruns and unexpected delays.

Key Features

2D Takeoff

Streamline measuring processes by calculating areas, lengths and counts with a single click.

3D/BIM Takeoff

Accurately estimate quantities and costs based on BIM files that incorporate large repositories of data.

Revisions Tracking

Easily highlight changes and update estimates based on revisions in source data.

RIB

Faster, Smarter and more Accurate Takeoff

Why customers love RIB CostX

CostX dramatically decreased the time we needed to spend measuring quantities. As a result, the time saved measuring was consequently spent on refining associated rates and allowed us to meet our strict deadlines while adhering to our impeccable standards.

GRC QUANTITY SURVEYORS

We are excited about the adoption of CostX in our business. CostX's enhanced functionality and ease of use will be of great benefit to our staff and ultimately our clients as we look to continually improve our service.

AECOM

Using CostX on the Brisbane Airport project enabled highly accurate quantities to be prepared and enabled the client to go to tender ahead of other projects that were competing in the same market.

RIB

www.rib-software.com

Driven by transformative digital technologies and trends, here at RIB we've made it our purpose to propel the industry forward and make engineering and construction more efficient and sustainable.

And through our 60-year industry experience and our truly global footprint of over 550,000 users and 2,700 talents, our vision is to transform our business into a global powerhouse providing innovative software solutions to our core markets - putting our people at the heart of everything we do.

Managing the entire project lifecycle from planning to construction and beyond, the development of our powerful portfolio of software solutions is driven by industry expertise, best practice and a passion to remain at the cutting edge of technology. Ultimately, connecting people, processes and data in innovative ways to ensure our customers always complete projects within budget, on time and to quality, while reducing their carbon footprint.

RIB Software is a proud Schneider Electric company.
